Friday 17th Strong winds and fine weather Middle and Latter part the Same all hands employed Potatoes this day

Saturday the 18th fresh winds and fine steering S the South under all Sail Middle and Latter part the weather Such the Same employed in Setting up Rigging

this day at daylight Missed a Native of our Number a Lad by the Name of James Lyman who as we supposed went over the Side in the night and fell over board and not knowing how to swim Sunk to rise no more and so he has gone to his long home - Making the 3d that has been taken from our crew in an instant as one may say since we sailed from home and all at the time in perfect health & buoyant hopes of many days to come - Did such is the life of Man - he is born and lives a few fleeting years and then is taken away and is forgoten by his fellow Man - as we shall be to day - for the Ship will work it goes on with the Same carelessness and indifference as though nothing had occured more than Common - oh thoughtless and hardened Man what will Shall you think of the past the present and the future and would
die as though you would live always
